The Cupar County Buildings is a major example of civic architecture combining historical functions of council chamber and courthouse. This style is broadly mirrored in the design of the 1924-5 addition to the east (built to a 1907 design). The building is well-detailed externally with a large Diocletian window,

pilasters, moulded architraves and a balustraded parapet. The Roman-Doric columned door piece provides an appropriately imposing entrance. As a whole the buildings form an impressive suite of county buildings that contribute to an architecturally rich area of civic buildings in the town of Cupar

There are records of a church at Markinch dating from the time of MacBeth but the present church tower was built in the first half of the 12th century. Pieces of Norman decoration still survive. It is believed to be one of the oldest buildings in Scotland still in continuous use - but why such quality and why Markinch? The tour guide will try to provide answers. The interior now has a light, elegant Georgian character.
